```

에러 발생

일단 git을 설치하고

로 명령어를 했더니

```

C:\Users\#tjoeun>cd ..
C:\Users>cd ..
C:\>cd reactnative
C:\reactnative>cd react-native-simple-chat
C:\reactnative\react-native-simple-chat>eas build:configure
❖ The following process will configure your iOS and/or Android project to be compatible with EAS Build. These changes only apply to your local project files and you can safely revert them at any time.

✔ Which platforms would you like to configure for EAS Build? » Android
✔ Generated eas.json
❖ Your project is ready to build.

- Run eas build when you are ready to create your first build.
- Once the build is completed, run eas submit to upload the app to app stores.
- Learn more about other capabilities of EAS Build: https://docs.expo.dev/build/introduction

C:\reactnative\react-native-simple-chat>eas build --platform android
❖ Android application id Learn more: https://expo.fyi/android-package
✔ What would you like your Android application id to be? ... com.leehongsi.reactnativesimplechat
✔ Using remote Android credentials (Expo server)
✔ Generate a new Android Keystore? ... yes
✔ Created keystore

Compressing project files and uploading to EAS Build. Learn more: https://expo.fyi/eas-build-archive
✔ Uploaded to EAS

Build details: https://expo.dev/accounts/leehongsi/projects/react-native-simple-chat/builds/976c5c74-6b71-4f9a-b2fe-f108a968673a

Waiting for build to complete. You can press Ctrl+C to exit.
