1. npm install -g eas-cli

2. login : eas login

(expo 계정으로 로그인)

3. .gitignore 에서 #firebase 부분 삭제

3. eas build:configure

4. eas build --platform android

5.

The screenshot shows the Expo Builds dashboard for a user named 'leehongsi' on the 'react-native-project'. The left sidebar contains navigation links: Dashboard, Overview, Deploy, Deployments, Builds (selected), Submissions, Channels, Branches, Updates, Configure, Credentials, Secrets, GitHub, and Settings. The main content area displays details for a specific build (ID: f23c0f9f).

Android Play Store build

SDK version	Profile	Version	Version code	Commit	Created by
47.0.0	production	1.0.0	1	8a7c7b4*	leehongsi

Additional Details

Build artifact

Android Play Store build (.aab) [Download] [Options]

Status	Start time	Queue time	Build time	Total time	Availability
Finished	Dec 30, 2022 11:10 AM	48s	7m 53s	8m 41s	29 days
